Algebraic Topology Homology And Cohomology

In homology theory and algebraic topology, cohomology is a general term for a sequence of abelian groups defined from a co-chain complex. That is, cohomology is defined as the abstract study of cochains, cocycles, and coboundaries. Cohomology can be viewed as a method of assigning algebraic invariants to a topological space that has a more refined algebraic structure than does homology.

In mathematics, Floer homology is a tool for studying symplectic geometry and low-dimensional topology. Floer homology is a novel invariant that arises as an infinite-dimensional analog of finite-dimensional Morse homology. Andreas Floer introduced the first version of Floer homology, now called Hamiltonian Floer homology, in his proof of the Arnold conjecture in symplectic geometry.

Floer homology - Wikipedia

This series reports on new developments in all areas of mathematics and their applications - quickly, informally and at a high level. Mathematical texts analysing new developments in modelling and numerical simulation are welcome. ...

Lecture Notes in Mathematics - springer.com

We define the homology of a simplicial set with coefficients in a Segal's Γ -set (\mathbf{S} -module). We show the relevance of this new homology with values in \mathbf{S} -modules by proving that taking as coefficients the \mathbf{S} -modules at the archimedean place over the structure sheaf on $\overline{\mathrm{Spec} \mathbb{Z}}$ introduced in our previous work, one obtains on the singular ...

Volume I of a pair of classic texts — and standard references for a generation — this book is the work of an expert algebraist who taught at Yale for two decades. Volume I covers all undergraduate topics, including groups, rings, modules, Galois theory, polynomials, linear algebra, and associative algebra. 1985 edition.

MATHEMATICS - University of Washington

My name is Daniel Murfet, I am a Lecturer (aka tenure-track Assistant Professor) in the Mathematics Department at the University of Melbourne. My CV is here and you can contact me by email. My papers are on the arXiv with the exception of my PhD thesis which you can find here. I run a seminar, the videos from which may be found on YouTube.. My primary research interests are in algebraic geometry ...

The Rising Sea

Algebraic Topology (Allen Hatcher) This introductory text is suitable for use in a course on the subject or for self-study, featuring broad coverage and a readable exposition, with many examples and exercises.

At some point a longer list will become a List of Great Mathematicians rather than a List of Greatest

Mathematicians. I've expanded my original List of Thirty to an even Hundred, but you may prefer to reduce it to a Top Seventy, Top Sixty, Top Fifty, Top Forty or Top Thirty list, or even Top Twenty, Top Fifteen or Top Ten List.
