

Aquatic Ecosystem Wikipedia

Aquatic Ecosystem Wikipedia

An aquatic ecosystem is an ecosystem in a body of water. Communities of organisms that are dependent on each other and on their environment live in aquatic ecosystems. The two main types of aquatic ecosystems are marine ecosystems and freshwater ecosystems.

Aquatic ecosystem - Wikipedia

Aquatic(s) means relating to water; living in or near water or taking place in water; does not include groundwater, as "aquatic" implies an environment where plants and animals live. Aquatic(s) may also refer to: Aquatic animal, either vertebrate or invertebrate, which lives in water for most or all of its life; Aquatic ecosystem, environmental system located in a body of water
