About the Watershed The watershed in Lake County comprises approximately 54 square miles, about 11% of the total area of the County. From north to south, Green Bay Road generally marks the drainage divide between the Lake Michigan watershed to the east and the Mississippi River watershed to the west (into which the rest of the County drains).

History of New York City's Water Supply System. See more images from the DEP Archives on Flickr.. Early Manhattan settlers obtained water for domestic purposes from shallow privately-owned wells.

History of New York City's Water Supply System

A TMDL is the calculated pollutant amount that a waterbody can receive and still meet Oregon

water quality standards. Through the TMDLs development process, DEQ determines the amount of a pollutant that a water body can receive without violating the applicable water quality standard.

State of Oregon: Total Maximum Daily Loads - Total Maximum ...

The Nonpoint Source (NPS) Outreach Toolbox is intended for use by state and local agencies and other organizations interested in educating the public on nonpoint source pollution or stormwater runoff.

Nonpoint Source Outreach Toolbox | US EPA

The Cedar River Watershed is made up of six large lakes fed by countless (80) streams that supply nutrients. The surrounding topography of our lakes is rugged and hilly making the under water contours similarly configured. Deep holes, shallow reefs, rocky rubble, steep drop offs, flowage from the streams, islands, bays and bottoms that range from gravel, to silt, to rocky rubble and overhangs ...

The Cedar River WaterShed - Test Fishing Site

Watershed. A watershed is an area in which all the rainfall drains into a specific body of water. Every river, creek, stream, swamp, etc. has a watershed; and wherever you are, you are in a watershed.

Municipal Operations and Watershed Informational Network

"The future of California is joined at the hip with the Sacramento River." — University of California geologist Jeff Mount, Ph.D. The Sacramento River is the largest river and watershed system in California (by discharge, it is the second largest U.S. river draining into the Pacific, after the Columbia River).

Sacramento River Basin | Sacramento River Watershed Program

1 1. INTRODUCTION The "Rules and Regulations for the Protection from Contamination, Degradation, and Pollution of the New York City Water Supply and Its Sources" ("Watershed Regulations")^{1,2} provide standards to ensure that stormwater discharges from certain construction activities within the
