90% of the time, fractions will be easier to perform arithmetic. Decimals are sometimes more useful when comparing numbers relative to one another, such as in a number line, but these questions are the exception. Even if given a decimal (or percent) looks easy, quickly convert to a fraction.

GMAT Quantitative: Fractions and Percents - Kaplan Test Prep

Even though there's no "new math" on GMAT Quant, there is still a ton of content to keep on our radar. And just like the tragic studying for a vocab test, we'll have to learn 200 different things, even though the test is going to only ask us 31 of those things (because we don't know which 31 things we'll get asked on our test day).
