Economic inequality covers a wide variety of topics. It can refer to either income distribution (measuring the amount of money people are paid) or the distribution of wealth (the amount of wealth people own). Besides economic inequality between countries or states, there are important types of economic inequality between different groups of people.

Beef production is immensely wasteful in terms of energy, massive environmental degradation, and diverting good land and crops away from feeding people to feeding cattle. It is a massive sector, primarily to produce for unhealthy consumption, yet takes up so much of the world's resources. It used to be a luxury item but now is consumed regularly.

Concern is rising at the priorities of medical research and pharmaceutical companies. There is concern that the profit motive has led to emphasis on research that is aimed more at things like baldness and impotence, rather than various tropical diseases that affect millions upon millions of people in developing countries. Unfortunately, while a large market therefore exists, because most of ...
