Function Machine Division: If you think the numbers are being divided by 2, simply enter $\div 2$. While there are many ways to show division by 2, this machine is a bit lazy and will always opt for the easiest function.

Literature Connections. These books provide literature connections that lend themselves to the introduction of functions as growing patterns. First, investigate and quantify the patterns in the books using T-charts or input/output tables to record the data.

`lua_createtable [-0, +1, m] void lua_createtable (lua_State *L, int narr, int nrec);` Creates a new empty table and pushes it onto the stack. The new table has space pre-allocated for `narr` array elements and `nrec` non-array elements. This pre-allocation is useful when you know exactly how many elements the table will have.

Featured Book: Two of Everything. Two of Everything by Lily Toy Hong recounts a Chinese folk tale. The farmer finds a magic pot which doubles everything that is put into it. This humorous story is a great introduction to function machines and input/output tables as teachers make the transition to the "doubling pot" and recording information in an input/output table.

CCSS.Math.Content.8.F.A.2 Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). For example, given a linear function represented by a table of values and a linear function represented by an algebraic expression, determine which function has the greater rate of change.

We introduce the word "functions" to students in 8th grade math. They, of course, have worked with functions in earlier grades. However, functions were previously referred to as input/output tables.
