Recreational Games In Mathematics

Recreational mathematics is mathematics carried out for recreation (entertainment) rather than as a strictly research and application-based professional activity. Although it is not necessarily limited to being an endeavor for amateurs, many topics in this field require no knowledge of advanced mathematics.

Welcome to the Math Wiki.. As Wikipedia administrators are so fond of saying: "Wikipedia is not a textbook". Math Wiki, on the other hand, is a textbook. We are currently working on 1,159 articles in the English-language. There are also companion wikis in other languages under development. Please support this project by adding content in whichever language you feel most comfortable.

A die (plural "dice") is a solid with markings on each of its faces. The faces are usually all the same shape, making Platonic solids and Archimedean duals the obvious choices. The die can be "rolled" by throwing it in the air and allowing it to come to rest on one of its faces. Dice are used in many games of chance as a way of picking random numbers on which to bet, and are used in board or ...

This is a follow-up to the handbook Introduction to Combinatorics, written by the same two authors, which was published in 2015. The topics covered here require more mathematical preparation than those in the earlier volume, but the style is deliberately discursive, with the explicit aim of exploring how to go about solving challenging problems, rather than just describing the finished solution.

A polyomino is a generalization of the domino to a collection of n squares of equal size arranged with coincident sides. Polyominoes were originally called "super-dominoes" by Gardner (1957). A polyomino with n squares is known as an n -polyomino or " n -omino." Polyominoes may be conveniently represented and visualized in the Wolfram Language using ArrayMesh.

Volumes can be written about mathematician's anecdotes. The bulk of the following collection is liberally copied and pasted verbatim from MacTutor History of Mathematics: Alan Turing was invited to join the club after he was spotted running by himself in the local area (probably in late 1945). 'We heard him rather than saw him,' Mr Harding says, 'He made a terrible grunting noise when he was ...
