Resource Management In Developing Countries

Water resource management is the activity of planning, developing, distributing and managing the optimum use of water resources. It is a sub-set of water cycle management. The field of water resources management will have to continue to adapt to the current and future issues facing the allocation of water.

Water resource management - Wikipedia

Human resource management (HRM or HR) is the strategic approach to the effective management of people in an organization so that they help the business to gain a competitive advantage. It is designed to maximize employee performance in service of an employer's strategic objectives. [need quotation to verify] HR is primarily concerned with the management of people within organizations, focusing ...

Human resource management - Wikipedia

Many thousands of people in developing country cities depend on recycling materials from waste for their livelihoods. With the focus of the Millennium Development Goals on poverty reduction, and of waste strategies on improving recycling rates, one of the major challenges in solid waste management in developing countries is how best to work with this informal sector to improve their ...
