

The Memory Of Lost Senses English Edition

The Memory Of Lost Senses

Recalling the work of Antonioni and evoking the Gothic in its emphasis on alienation and disjunction, *Lost in Translation*, together with other recent romantic comedies, represents a significant shift in the romance genre.

Neon Gothic: Lost in Translation • Senses of Cinema

In computing, memory refers to the computer hardware integrated circuits that store information for immediate use in a computer; it is synonymous with the term "primary storage". Computer memory operates at a high speed, for example random-access memory (RAM), as a distinction from storage that provides slow-to-access information but offers higher capacities.

Computer memory - Wikipedia

Sensory memory is the shortest-term element of memory. It is the ability to retain impressions of sensory information after the original stimuli have ended. It acts as a kind of buffer for stimuli received through the five senses of sight, hearing, smell, taste and touch, which are retained accurately, but very briefly. For example, the ability to look at something and remember what it looked ...
