

The Structure Of Multimodal Dialogue Human Factors In Information Technology

The Structure Of Multimodal Dialogue

Multimodal interaction provides the user with multiple modes of interacting with a system. A multimodal interface provides several distinct tools for input and output of data. For example, a multimodal question answering system employs multiple modalities (such as text and photo) at both question (input) and answer (output) level.

Multimodal interaction - Wikipedia

A dialogue system, or conversational agent (CA), is a computer system intended to converse with a human with a coherent structure. Dialogue systems have employed text, speech, graphics, haptics, gestures, and other modes for communication on both the input and output channel.

Dialogue system - Wikipedia

Automobile users provide their own garage and vehicles and so have greater direct control over convenience and comfort features. Public transit users depend much more on publicly supplied facilities and services and so are more affected by the methods use to evaluate service quality.

1. Introduction. Dialogue is a distinctive human achievement with evolutionary and social relevance (Müller-Mirza & Perret-Clermont, 2009). Theoretically, dialogue is a complex concept that draws on many different traditions, beginning with Socrates and Plato, and including Dewey as well as more recent authors (as elaborated in Section 2). However, in the literature the term has been elaborated ...

Today's internet, accessed by fixed and mobile networks, allows us to transmit files, voice and video across the planet. With the emergence of an ultra-responsive and reliable 'Tactile Internet,' advanced techniques in robotics and artificial intelligence, we predict the emergence of an 'Internet of Skills' which allows the transmission of labor globally.

1. Introduction. In early childhood education, book reading and storytelling have traditionally been seen as learning activities that lay the groundwork for children's literacy development (Collins, 2010, Heath, 1983, Whitehurst et al., 1994). There is, however, another side of stories (written and oral narrative texts), that is, their potential to promote children's socio-emotional learning ...
